☼ Solution

ZeroLock® Platform: Security built specifically for Linux and ESXi to protect your most critical data and workloads.

⊘ Problem/Pain Point Solved

Redefining Linux security by:

- ✓ PREVENTING ATTACKS WITH REALTIME VIRTUAL PATCHING - Use SSH Multifactor Authentication, process behavior controls, tamper protection, canary files and more to create universally applied rules and polices that can be deployed across your Linux and ESXi environments.

- ✓ ENSURING UPTIME WITH AI DETECTION AND AUTOMATED FILE ROLLBACK - Stop traditional and file less attacks with >98% efficacy and automatically rollback file damage. Protect against ransomware, wiperware, cryptojacking, automated attacker persistence, and more.

- ✓ GETTING UP AND RUNNING FAST WITH ONE-LINE DEPLOYMENT - ZeroLock works across all Linux distros 3.5+ and ESXi 5.0+ with no kernel module and without compromising system stability.

- ✓ LEVERAGING OUR API-FIRST ARCHITECTURE FOR SIMILIFIED MANAGEMENT- Built with SIEM/SOAR integration capabilities, ZeroLock can integrate easily into your existing environment.

💼 Company Overview

Vali Cyber, Inc. was founded in 2020 with the mission of addressing the specific security needs of Linux and its derivatives. By focusing on creating a Linux-first security solution with increased efficacy and reduced Total Cost of Ownership (TCO), we created the **ZeroLock® platform**.

💳 Pricing

Servers starting at $180* | Container Orchestration Nodes starting at $360* | ESXi Hypervisors starting at $3,600* (Prices per year)
